💁‍♂️Work experience

Front-end Web Engineer

FPT Software, 9/2022- 6/2023

Front-end developer

- Recruit project - a platform to support find a job in Japan
- Team size 70 members (20 members on team FE)
- My day job is progress reporting, functional analysis, UI code, logic code, test writing, testing.

Achievements and skills gained:

- Use ReactJs, VueJs and Typescript to developing project.
- Jira and AWS for product development.

Functions include:

- Filter, search, CRUD job.
- Use the Zod and React Hook Form to validate the form.
- Unit Test
- Manage components with Storybook.

Because I have some household chores. And I also want to become the freelance worker. I asked to leave the company.

Here we also have seminars to share technology for the team to discuss and find the optimal solutions for the products. And I have share about syntax VueJS for team front end.

Amela company, 2/2021 - 6/2022

Front-end developer

- Hotel reservation management project - a platform to support manage and book room hotel for customers in Japan
- Team size 9 members
- Design and coding landing page, business analysis and coding function for project.

Technologies used: Reactjs, VueJs, Tailwindcss, React Hook Form, Yup.
Functions include:

- Use the Yub and React Hook Form to validate the form.
- Function of calculate the price of the reservation.
- Search, filter and CRUD room.

We used ReactJs to development front-end and JavaSpring to development back-end.

I also have technology sessions here to improve performance and improve code quality.

👔Side Projects

Shopee clone

This is a project to clone the user page of the e-commerce platform Shopee.

Technologies used: REST API, ReactJs, Typescript, Tailwindcss, React Router, React Hook Form, Yup, React Query, Vite, Vitest, Storybook, ESLint, Prettier, React Helmet

Functions include:

- Manage authentication with JWT (automatic token refresh applied)
- Use the Yup and React Hook Form to validate the form.
- Smart Pagination, Filter, and Product Search
- Incorporate state into the URL to easily share results across devices.

- Asynchronous state management with React Query
- Code Splitting
- Improve performance by optimizing build file size analysis.
- SEO with React Helmet
- Separate the private and public routes.
- Unit Test
- Manage components with Storybook

🔧 Skills

🔡Programming Languages

Javascript, TypeScript.

I'm quite confident that I can catch up with other languages when needed very quickly.

💻Web Front-end Technologies

React, Vue, Next.js, React Query, RTK Query, Redux, Styled Components, TailwindCss, Sass, Webpack, Axios, Vite, Vitest, Mock Service Worker, HTML5, CSS3, SEO.

🧮Web Back-end Technologies

- Protocols: REST, HTTP(S)
- Frameworks/Libraries: Java, Node.js.
- Cloud Services: Vercel, Netlify

🛠Database

- SQL Server, MySQL, MongoDB

🔨Dev Tools

Git, Postman, Lighthouse, React Developer Tool, Redux Dev Tool, React Query Dev Tool, Github, Gitlab, Figma, VS Code, Bash

💁‍♂️Industrial & Interpersonal Skills

Write, Present, Teamwork, SEO.

📚Education

Software Engineering

FPT University - Software Engineering, 2018 - 2022

👄Languages

- **English**
  Read and understand specialized documents.
- **Vietnamese**
  Native speaker.
